

MACHINE LEARNING ENGINEER (SPECIALIZED IN TRANSFORMER NEURAL NETWORKS) (M/F/D)

BECOME PART OF AN AI REVOLUTION

natif.ai is a young deep-tech company. We at natif.ai are developing an artificial intelligence that is supporting our customers to derive knowledge out of all kind of documents and to automate the processes around them.

Every day people spend a lot of time and effort manually extracting and processing data from these documents. We will stop that and give them the time to focus on decisions and tasks that really matters. We use a unique combination of computer vision and natural language processing to solve this problem efficiently, scalable and cost-effectively.

WHAT WE OFFER:

- Our employees matter to us: We offer you a permanent contract
- Challenging tasks at the latest development of AI
- Work-Life-Balance: Flexible working hours
- The environment to personally and professionally grow with a young and striving company
- Work directly on campus close to the DFKI
- Home Office by arrangement
- Open corporate culture with super flat hierarchies
- You will work with bleeding-edge technology and we promise exceptionally exciting and innovative projects
- The best colleagues and a great team spirit

YOUR MISSION:

- You will be part of our data scientists and machine learning team, working on the latest state of AI development
- You will train transformer based neural networks from scratch
- You will develop transformer networks for specialized tasks
- You will support our team defining and executing new ML initiatives
- Together with us you will work on the core of our document understanding solution which is based in computer vision and natural language processing.

YOUR PROFILE:

- You are machine learning engineer with all your heart, a AI Craft(wo)man, a nerd, a geek or a AI Artist
- A successfully completed Master in Mathematics, Statistics, Physics or Computer Science
- Proven experience in working with transformer networks
- Professional experience in Tensorflow with Python
- At least two years professional experience in Machine Learning
- Experience in general software engineering especially with Python
- Open-minded and willing to push the boundaries of AI even further
- Knowledge of the HuggingFace transformer library is a plus
- Scientific background is a plus
- Fluent in German and or English
